

POWER SUPPLY

APOLLO LIGHTING
ELECTRICAL SERVICE

Powering Your Event

MAINS POWER CONNECTION

Where Mains Power is available Apollo Lighting Service will utilize that supply to its fullest provided that a cost comparison proves it to be the best option.

Whether you need to plug into outlets supplied by the landowner (council or similar) or by hardwiring existing distribution systems to make use of spare power

Apollo Lighting Service will install distribution systems that are safe, compliant, cost effective, reliable and suited to your requirements

Apollo Lighting Service's electricians can also organise connection to the SAPN power network and supply and connect Meter Boards to effectively utilize cost effective power.

Available only after site inspection and SAPN approval is given.

POWER GENERATION

Apollo Lighting Service, with its power generation partner Aggreko can supply generated power and distribution systems from 2 to 2000 kVA.

Being in the business of power distribution for events for over 40 years means we have a solid understanding of the needs and requirements for any event or function you can imagine.

Aggreko's silenced generators are perfect for events where you have restricted space available and need it to be as quiet as possible.

Aggreko generators are available in a wide variety of sizes from 10kVA to 2000kVA in trailer mounted, skid and containerised options, most units can be paralleled together for redundancy making them ideal for events that need 100% reliable power.

Apollo Lighting Service can also supply 2 to 6 kVA generators for when smaller power supplies are all that's required

By using Apollo Lighting Service and Aggreko as your power generation supplier and power distributor you will have peace of mind knowing you have a reliable power supply and distribution system, that is safe and cost efficient, ensuring that your event will be a success.

POWER DISTRIBUTION

Apollo Lighting Service has been supplying temporary power distribution solutions for all types and sizes of events for over 40 years.

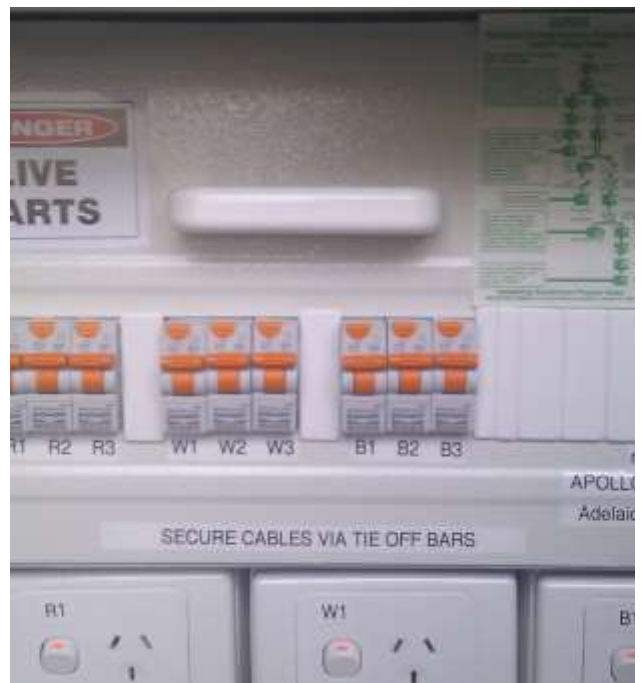

This experience, along with our vast range of purpose built equipment ensures that you will get a distribution system that is safe, compliant, on-time and value for money to ensure you a successful event.

Apollo's equipment encompasses everything from 240V and 3 phase extension leads, single phase and 3 phase distribution boards to meter boards from 100 to 800A and heavy duty Power-Lock supply cables.

Whether it's 1 caterer for a wedding or corporate function, 5 -10 caterers or stalls for a fete or market to 50 caterers and stalls for a major music festival, Apollo Lighting Service has the experience and equipment to power your event.

Risk Management and Compliance to standards and regulations are a high priority for Event Managers, and us as suppliers/ contractors. All of Apollo Lighting's equipment and installation procedures are fully compliant with AS/NZS3000 (wiring rules), AS/NZS3002 (shows and carnivals), SAPN Rules, SafeworkSA regulations and any other standards that are applicable to an event. All equipment is Tested and Tagged and all distribution boards have RCD protection on all final sub-circuits.

For your peace of mind all distribution planning and installations are headed up by Apollo's fully qualified electrical Project Managers.
