SITE LIGHTING

APOLLO LIGHTING ELECTRICAL SERVICE

Powering Your Event

LIGHTING TOWERS

Lighting for large area non specific zones can be completed using a variety of methods.

You can use Lighting Towers that can be self powered units giving you non specific area lighting for up to 4500m² on a 9meter telescopic tower for all those Zones where generated or grid power is not easily available to you.

If power is not a problem you can have Portable Winch-up towers that elevate up to 5 meters with a variety of lighting options available from 4 x 1000W Metal Halide lamps to 200W LED's whatever lights are necessary to give you your required lighting capability.

SPECIALIST LIGHTING

Specialist lighting can mean a variety of things but at Apollo Lighting it means lighting your event in the best possible way to give your event the look it deserves.

At Apollo we try and give our clients the look that people will remember and that means offering you everything from Party Festoon lights to Inflatable balloon lights, from Silk Lanterns to Tube lights or even from Fairy Lights to Cone Lights in effect lighting up your event in a way that people will remember.

For more information on Lighting Balloon, Tube or Cone lights please see our Crystal, Tube and Cone light brochures.

AREA LIGHTING

General Lighting Options:

When it comes to lighting up an event the choices are many and varied. You may be looking to give your event a certain atmosphere or just turn night into day. Area Lighting can be decorative or functional or both, covering small or large areas, using one or a combination of different lights. From Fluros to Festoons to Floods to Lighting Towers Apollo Lighting can supply all of your site lighting needs.

Festoons:

Festoons can have coloured or white globes or, depending upon the weather conditions you can use Rice lanterns in one or a variety of colours and sizes to give you that special look as well as lighting the area. Festoons can be run through trees or attached to poles along pathways to direct people around your event safely and effectively.

Festoon lighting is available in dimmable incandescent colour or white globes or energy efficient eco-friendly LED globes.

Floods:

Floods can be on poles, in trees or attached to structures to give light where you need it, either front or back of house, Coloured globes and gels will give you lighting effects for large scale illumination or just to give your patrons a different or softer light to walk around in.

Floods can also be used to light trees or buildings or structures to create spectacular backdrops to your event or venue.
